INTRODUCTION

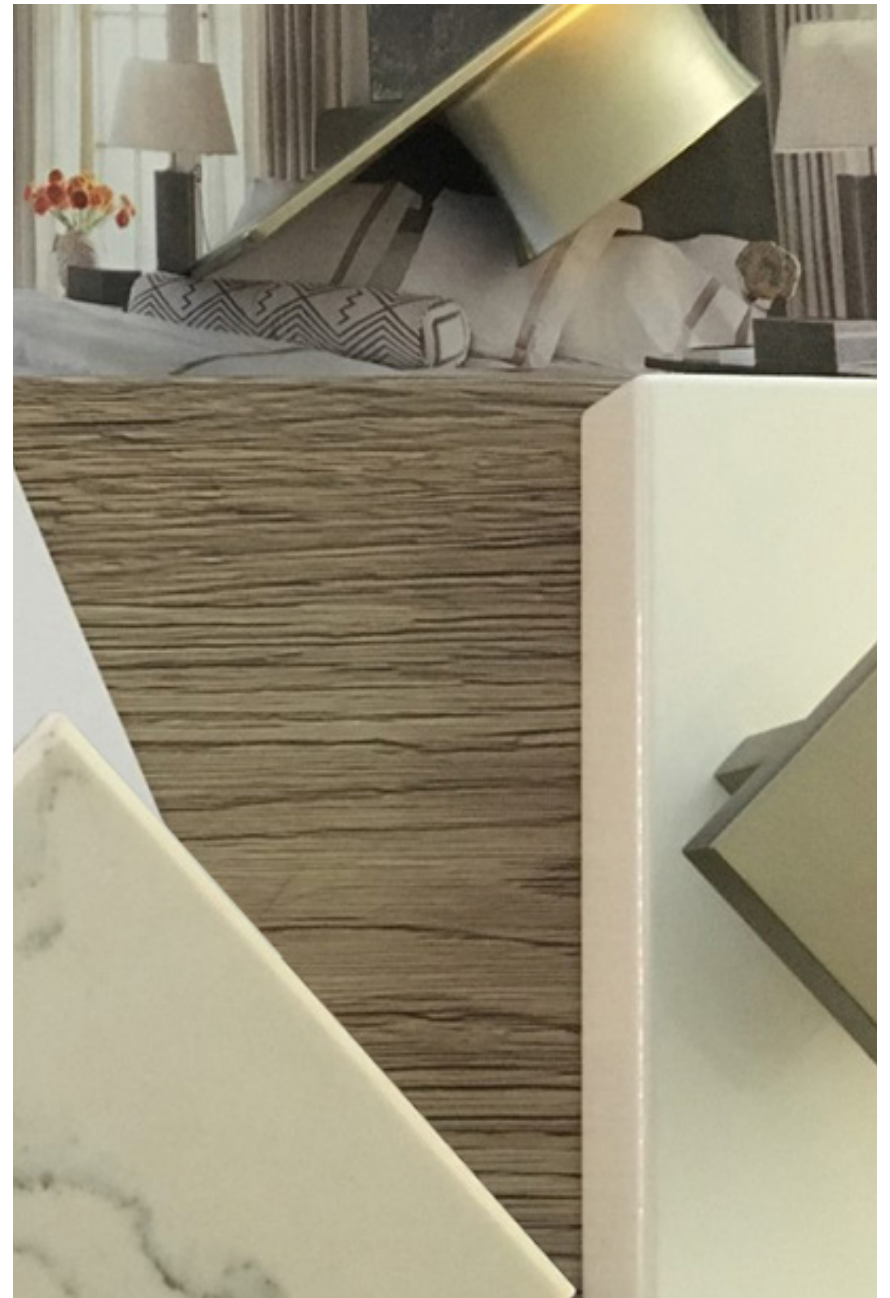

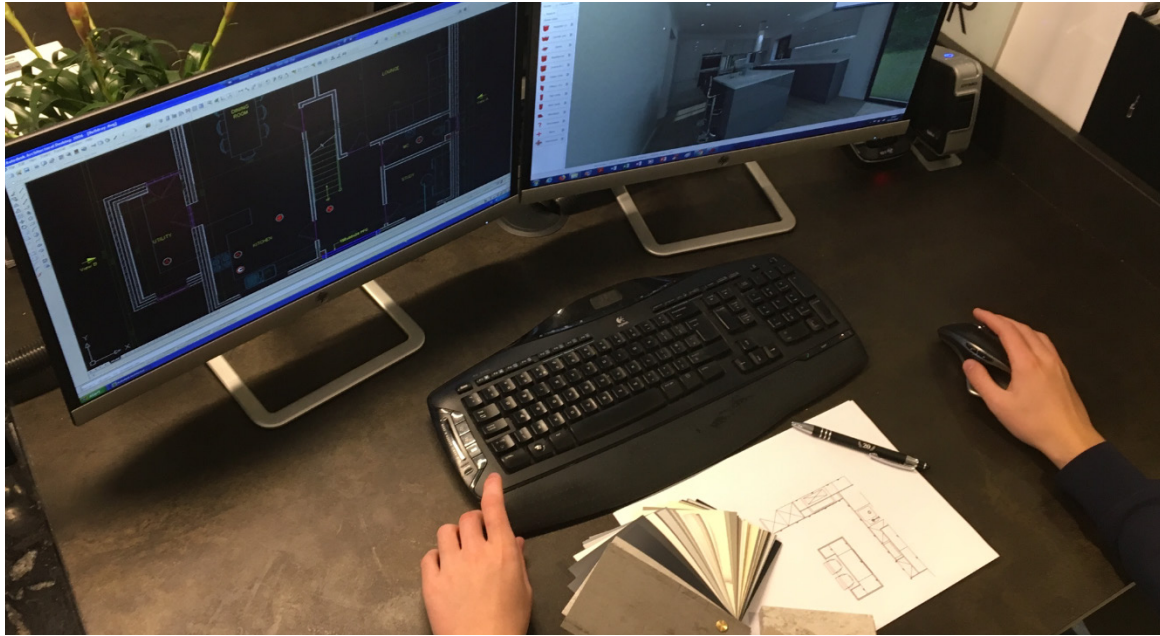

Professional design and craftsmanship, with award winning services.

A well designed kitchen is everyone's dream and with the help of Danmar Kitchens it is within everyone's grasp. The perfect kitchen is a multi-functional room depending on the needs of the family, no longer just a room to cook in, it is the heart of the home, a room where the family can relax, entertain friends, or perhaps simply enjoy a pleasant environment where the children can do their homework while the evening meal is being prepared.

No two families are the same and there are other major factors to consider such as the space you have to work with and the budget. This is where Martyn Ive and his team can step in, not only can they transform your dreams into reality but their extensive experience means that they can offer new ideas and solutions to create a better kitchen.

Danmar is an independent trading kitchen company, meaning we do not sell any specific appliances, worktops or handles pushing customers to choose certain companies, our customers decide the budget and function, Danmar will then discuss potential options or other ideas to ensure a customer is happy with the price and the product.

Our design studio is positioned in West Malling and our spacious studio offers customers an extensive range of kitchen displays, appliances and worktops.

Book a consultation with one of our professional team members. Sit down and enjoy a hot drink while you chat with one of our design representatives, discussing our huge variety of colours for both internal and external units from an array of manufacture all to ensure we find the perfect materials for your dream kitchen. Also, with our grand selection of worktops, a customer is able to decided which worktop suits their kitchen and budget.

Then after collecting ideas over colours and styles, you will then join one of our designers and create a selection of mood boards. This allows our customer to be able to see how their external, internal, handles and colours will affect one another when together. Due to our large variety Danmar is able to create a few options of mood boards and just play with them until our customers are completely satisfied regarding their choice.

KITCHENS

PROFESSIONAL, TIMELESS, STUNNING

Explore our vast collections of different styles and colour palettes, taking inspiration through our exquisite ranges.

Danmar has the design and machine capability to create an array of stunning kitchens for our customer's home, using the styles of our customers to create a personalized dream kitchen.

Take inspiration from our portfolio to see our capabilities and how certain colours and styles will affect and change your kitchen all for the better. Every house has its own personality, quality features and styles. Enjoy a sit down with one of our designers, in this consultation mood boards will be created comparing and contrasting different colours to find which one our customer is happy with the most. Also, having the design and machine capability to create an array of stunning kitchens for our customer's home, using the styles of our customer's choice to create a personalized dream kitchen.

Danmar also works with a broad spectrum of different clients, from residential to commercial, from budgeted to all out no expenses. We will tailor your experience at Danmar to best suit our customer's needs and expenses. Offering cabinetry that is handcrafted to a beautiful bespoke standard providing exceptional quality regarding all aspects of our client's future kitchen. We can offer our customers vinyl wrapped doors, if they are looking to spend less or have young children, who might damage cabinets in the future.

Danmar's Contemporary Range

Why choose a contemporary kitchen? Nowadays there is a vast amount of choice for colours, textures and styles so deciding which manufacturer best suits our customer's contemporary needs, is important. Danmar works with the company Xylocleaf, their selection of original and one off cabinetry provides a nice shake up in styles of what most people thought possible to have in their homes. This variety allows our customers to explore more styles and not feel that they're limited to a dozen of colours, making their kitchen truly personal.

When it comes to choosing the right worktop for your home Danmar once again has a grand variety of different companies, all with a large range of styles, textures and patterns. Danmar works with companies such as Ceaserstone, Lapitec, Dekton, Cambria and Cilestone. All of these companies have great differences in prices and styles, so with Danmars extensive collection we are able to create a variety of mood boards for visual aid.

CONTEMPORARY KITCHEN

Socialise with friends around an inviting island!

Here we have a modern two tone, high gloss kitchen. The choice of colours for this kitchen, gloss white and metallic grey are excellent as they compliment the style of contemporary. In addition to creating a sociable and inviting kitchen that invites friends to gather around and chat, all while helping prep or to just have a drink around.

The smart layout of the appliances helps make the kitchen feel modern and advanced, making life easier for the user. The integration of a double oven, coffee machine, wine cooler, hob and extractor fan is an excellent choice as the colour's compliment the modern style. This integration is always beneficial for ease of access for our customers.

Having an island is always a stunning feature to add to your kitchen, it creates a large amount of storage for bigger pots and pans as well as open shelving for books. Danmar will always tailor the cabinetry to best suit the needs of our clients, whether you are a foodie who needs the utensil space or need the space to feed the family.

“Danmar designed and fitted my beautiful cabinetry. I used them because they’re know for high end innovation & quality”

MR & MRS MARDELL

Cabinetry - Beach Oak Laminate

Danmar's Traditional Range

A traditional kitchen always creates an elegant and homely atmosphere. The neutral colours feel softer and inviting for friends and family gather in and socialize while everyone helps chip in for making Sunday lunch. With our vast machine capabilities we are able to produce beautiful bespoke joinery for a traditional room, with around the room high quality detailing; mantel piece, doors, tongue and groove panels and cornice to really bring traditional life to your kitchen.

Danmar will help guide a customer with which appliances will best suit the style of your home and the style of cooking. We can provide traditional Agas that will match the style or we can provide traditional cabinetry and then easier access modern appliances. In a traditional kitchen, large metal knobs and handles best suit the traditional style as they have an appearance of being handcrafted and the designs are aged as they have been used for many years.

CONCEPTUAL KITCHEN

Bold & inviting kitchen to wow family & friends

Here we have a stylish take of a conceptual kitchen that uses a light but bold colour scheme which optimises storage space and is personalised to match the cooking needs of our client. Firstly, looking at the colour choice, the majority of the units have been hand painted in Ichira Blue which, is a bold choice which compliments lighter colours used from the Dekton Enzo worktop and the custom leather island worktop.

Our customer for this kitchen is real foodie who loves cooking and prepping big meals for family and friends. The choice of appliances and layout were a key feature when designing this kitchen, the hob, ovens, plate warmers and microwave have been housed in a tall larder unit all aligned for making cooking easier as it is all on one side as well as having enough space to entertain and feed plenty of guest.

As cooking was such a big influence for this customer smart storage needs to be taken into serious consideration. Enough space to fit an array of pots, pans, mixing bowls and many more cooking utensils and equipment, that is why we designed a range of different draw sizes which will be beneficial for a real foodie as this space means out of sight utensils.

Danmar's Traditional Oak Range

Stunning handcrafted oak furniture is made here at Danmar, using our workshops high end machinery with our sublime British Craftsmanship that is created on site for a customer's dream kitchen. As we have little limitations from our craftsmen regarding styles and preferences we are able to create a truly bespoke kitchen for our customers, right down from the plinth to the cornice.

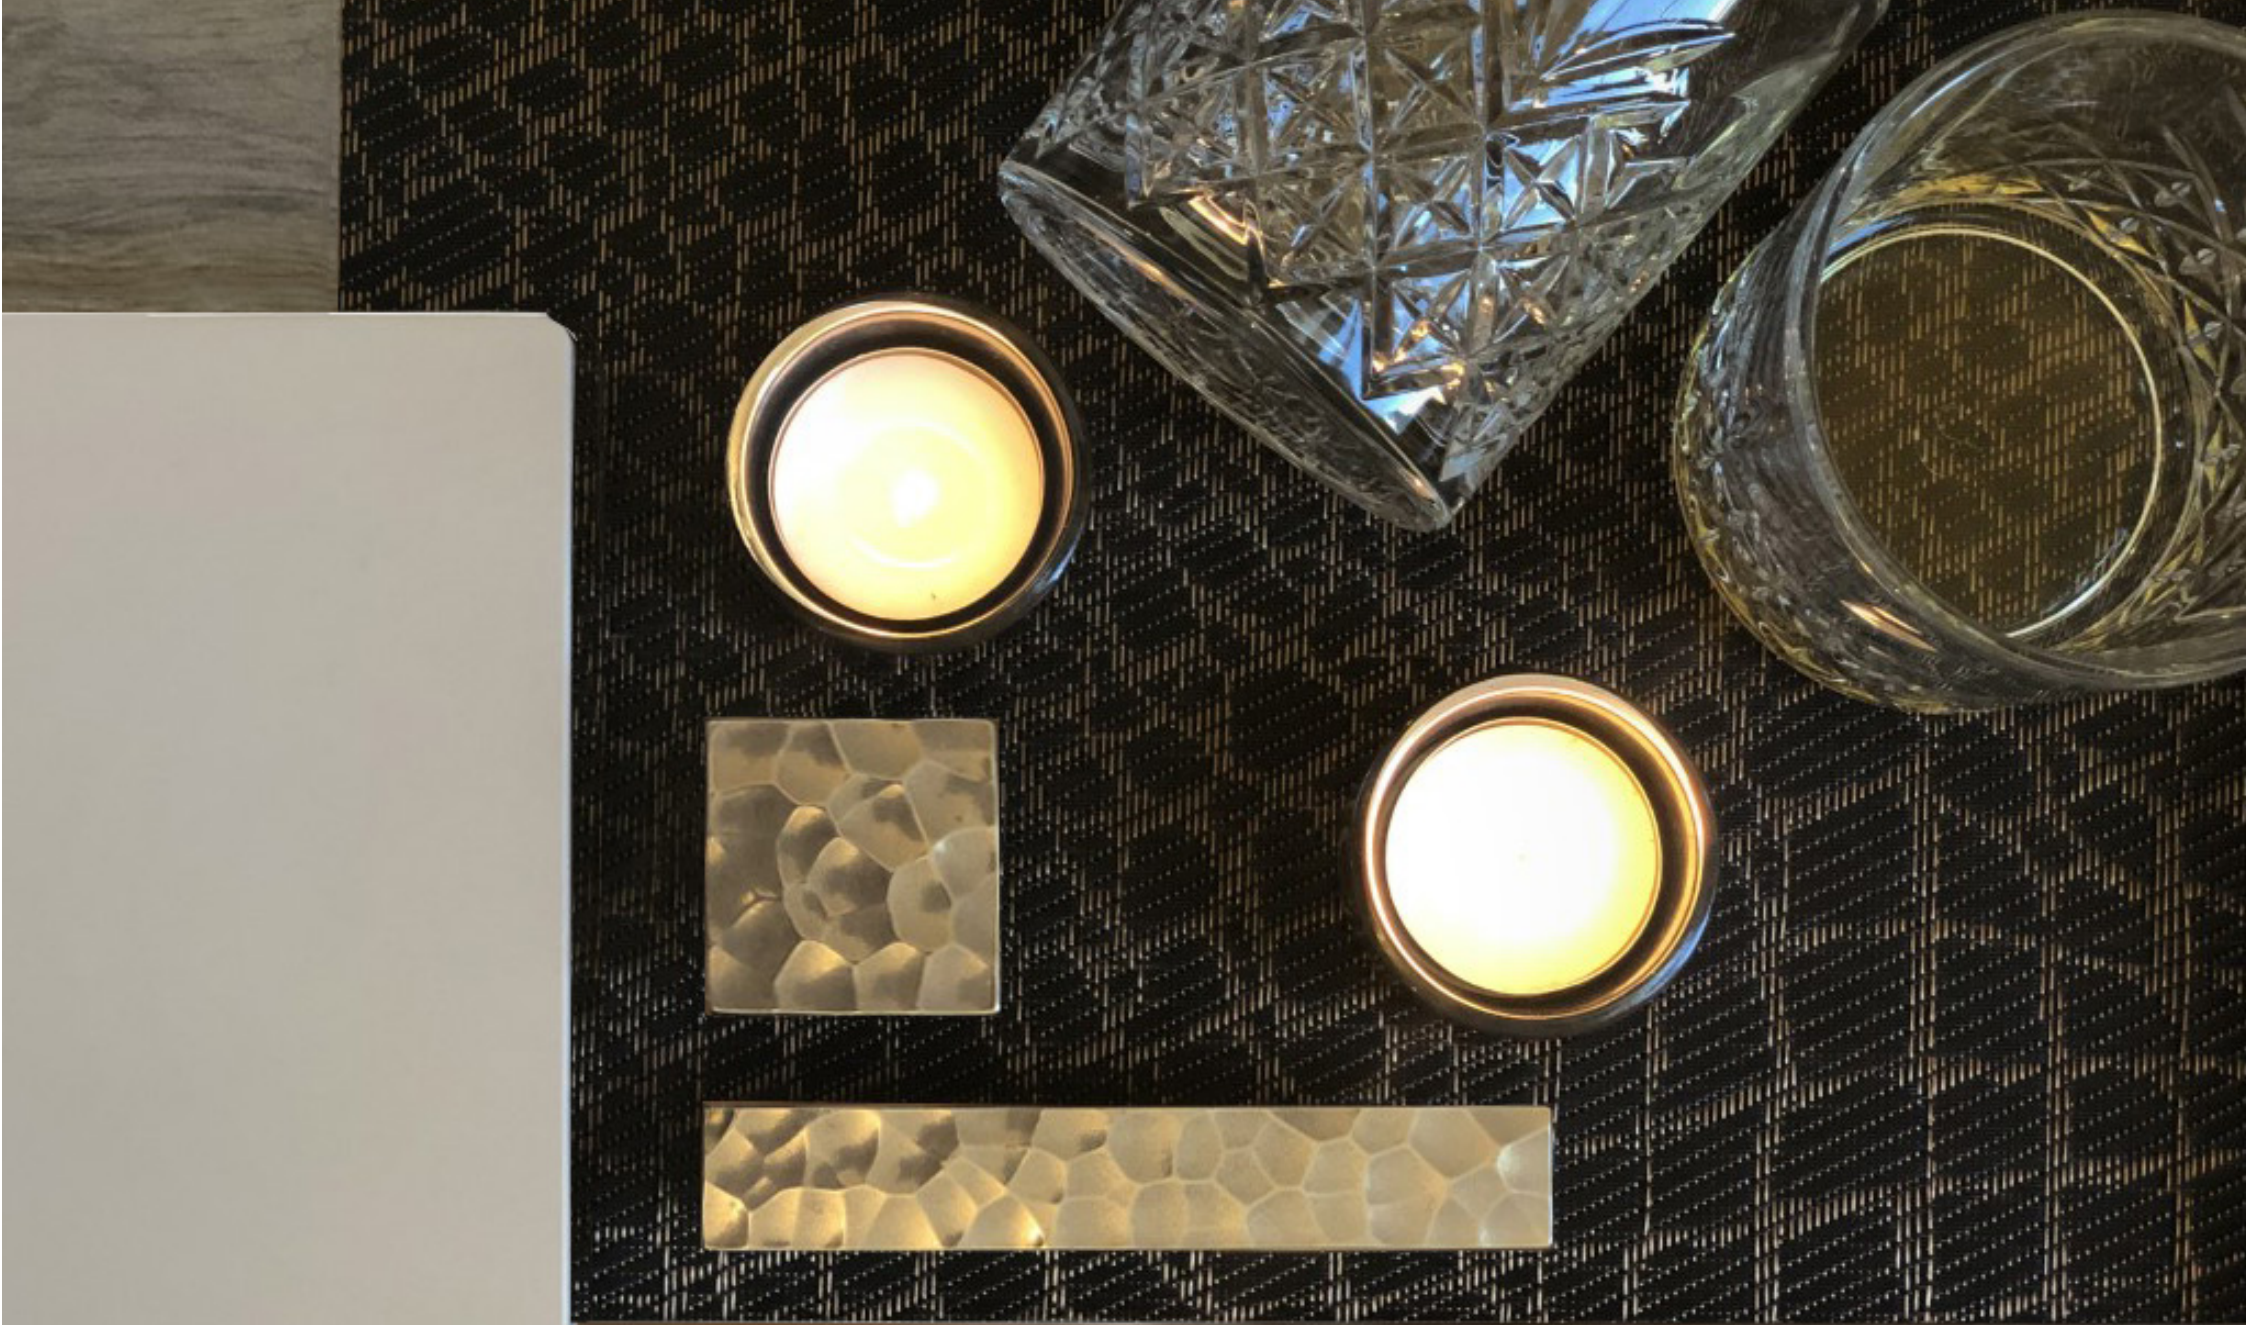

Danmar's Bespoke Oak Features

The decision to have an oak kitchen is always a beautiful choice. A handcrafted oak kitchen by Danmar will always have the fine detailing and exquisite design that most people expect and require when having a completely bespoke kitchen. All pieces are handcrafted created by one of our highly qualified and precise joiners.

BEDROOMS

ORIGINAL, DISTINCTIVE, EFFORTLESS

Explore our vast collections of different styles and colour palettes, taking inspiration through our exquisite ranges.

PAINTED FURNITURE

ELEGANT, DISTINCTIVE, CLASSIC

At Danmar, the choice of colour and finish is limitless. From spraying in house to painting on site, we offer a service to suit your needs.

The variety of colours we are able to provide for our customers is vast, able to mix colours or we can provide paint from any paint manufactures, all able to work around what the client needs and their budget. Painted furniture is always beautiful when done properly, but as time goes on accidents do happen, but as our customer has painted, this is an easy fix. If caught, scratched or dented, it is easy to fill the mark to be then sanded and finished with the original paint.

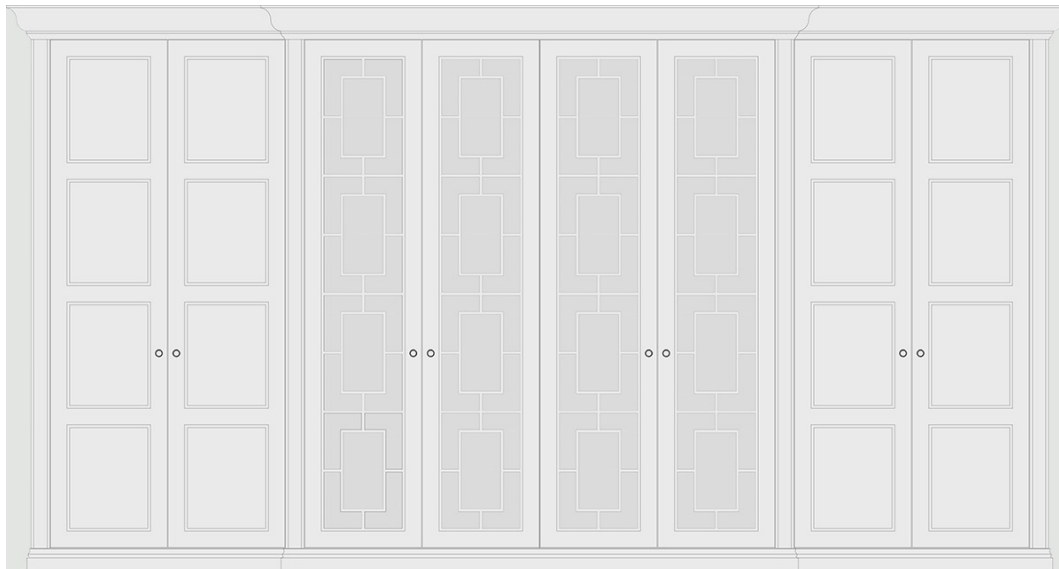

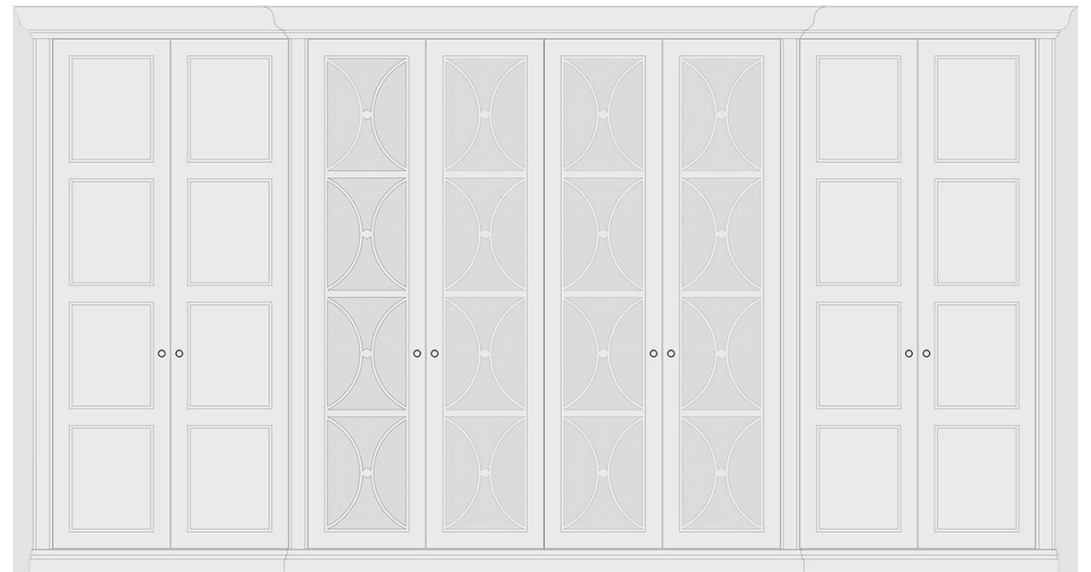

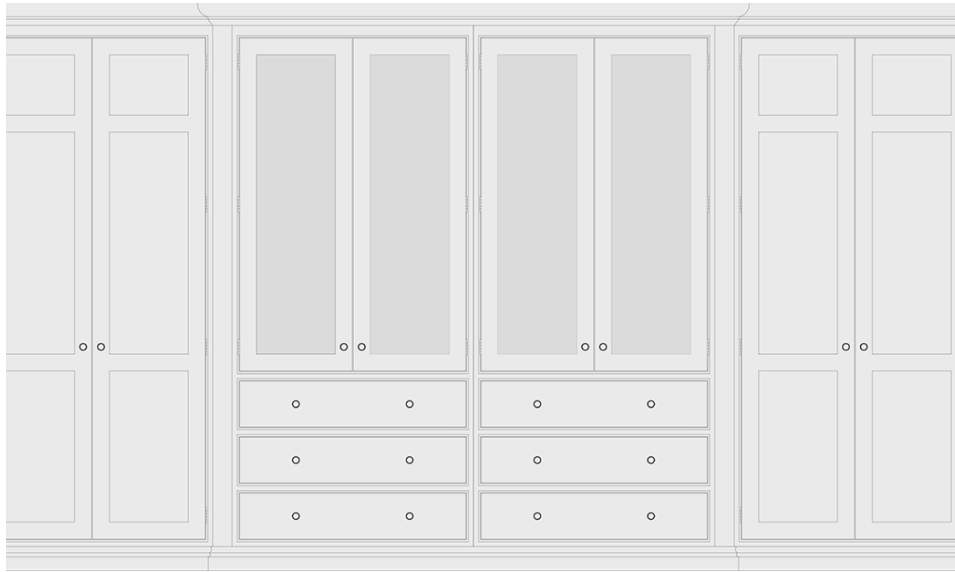

In addition being able to repair the doors if ever caught, painted furniture allows you to hide the seams between the furniture creating even more flushed design, vinyl and veneer doors are not able to create the completely seamless effect as the material wouldn't bind together. Another upside to having painted furniture is that if your tastes towards the colour change or if you feel you have found something better, it's as simple as sanding and repainting to create a new style for our customers' bedroom.

Stunning & timeless furniture for all styles

In this image we have one of our traditional fretwork bedrooms, using a light colour palette allowing the room to feel elegant. A key design feature of this bedroom, is the built-in wardrobes. This feature is aesthetically pleasing as the wardrobes achieve such a clean finish, all edging can be filled in creating an either further flushed finish making the wardrobes part of the room and not just stuck on the side.

This integration as well as creating a sleek finish, means that a lot of space is saved around the rest of the bedroom for decorative pieces or furniture whatever the customer prefers. Not only does it provide a great deal of space for the rest of the room, but provides a beautifully planned and bespoke smart storage options which can be tailored to our customers fashion needs or what items they own more of.

Danmar's 3D Features

The Danmar designers are professionally trained and qualified to use Autocad programs. These qualifications allows Danmar to create stunning and to scale designs of our customers furniture, this helps our clients see close up the fine detail of their new wardrobes and how the styles will fit in with their room or the home decor that is already owned by the client.

“They’ve always showed excellent customer service in helping me; new ideas, new equipment and other ways to consistently enhance my kitchen”

MR & MRS JEFFERIES

Sevenoaks, Kent

Wrapped Furniture

Why choose to have wrapped furniture? There are many advantages, one being the variety. We are able to provide textured and untextured to such a grand variety of colours, textures and styles able to meet array of abstract tastes and styles to suit the personality of our client. This collection allows people with a smaller budget to be more expressive with what styles can be achieved, all while producing stunning furniture that can wow all the family.

Over a period of time accidents can happen, someone catches the door with a corner of furniture, scratching the door and needs replacing. Danmar will source the same door and measurements to replace the damages. As this door is vinyl wrapped and not a bespoke door this is a cheaper an easy fix. If you have younger children this can be common, we would recommend choosing a matt finish as this is easy to clean surface which doesn't show up finger marks making.

Carcass - Egger Premium White

STUDIES

ELEGANT, CHARMING, STYLISH

Explore our vast collections of different styles and colour palettes, taking inspiration through our exquisite ranges.

Danmar's Studies

When designing a new study there are a many key features we will think about and ask our customer, to ensure that we find out how to make this work space truly bespoke and personal. Asking lots of questions about future work in order to achieve a better understanding what storage solutions suits our customer, wheter it be space for filing or open base units for computers or both and more. Individually discussing the purpose of each unit and draw, all to ensure that we are personalizing our client's studies to their exact needs and styles.

Also, creating fully purposeful units to make life easier, we can also add smart and discrete AV/media racking on the furniture (that may require it) maintaining with the sleek and professional finish. Another upside to the media racking is the maintenance and protection of the cables, the racking that will be used keeps the cables secure and prevent them getting tangled which can damage them. If security is important for our customer we can provide security cameras around the study in discrete locations so they will not stand out or become an eyesore.

“The fitting team were efficient, skilled, tidy and reliable. All are very friendly at Danmar, making us feel invited from the start.”

Mr & Mrs Coleman Study
Worktop - Super Matt Indigo
Cabinetry - Super Matt Indigo

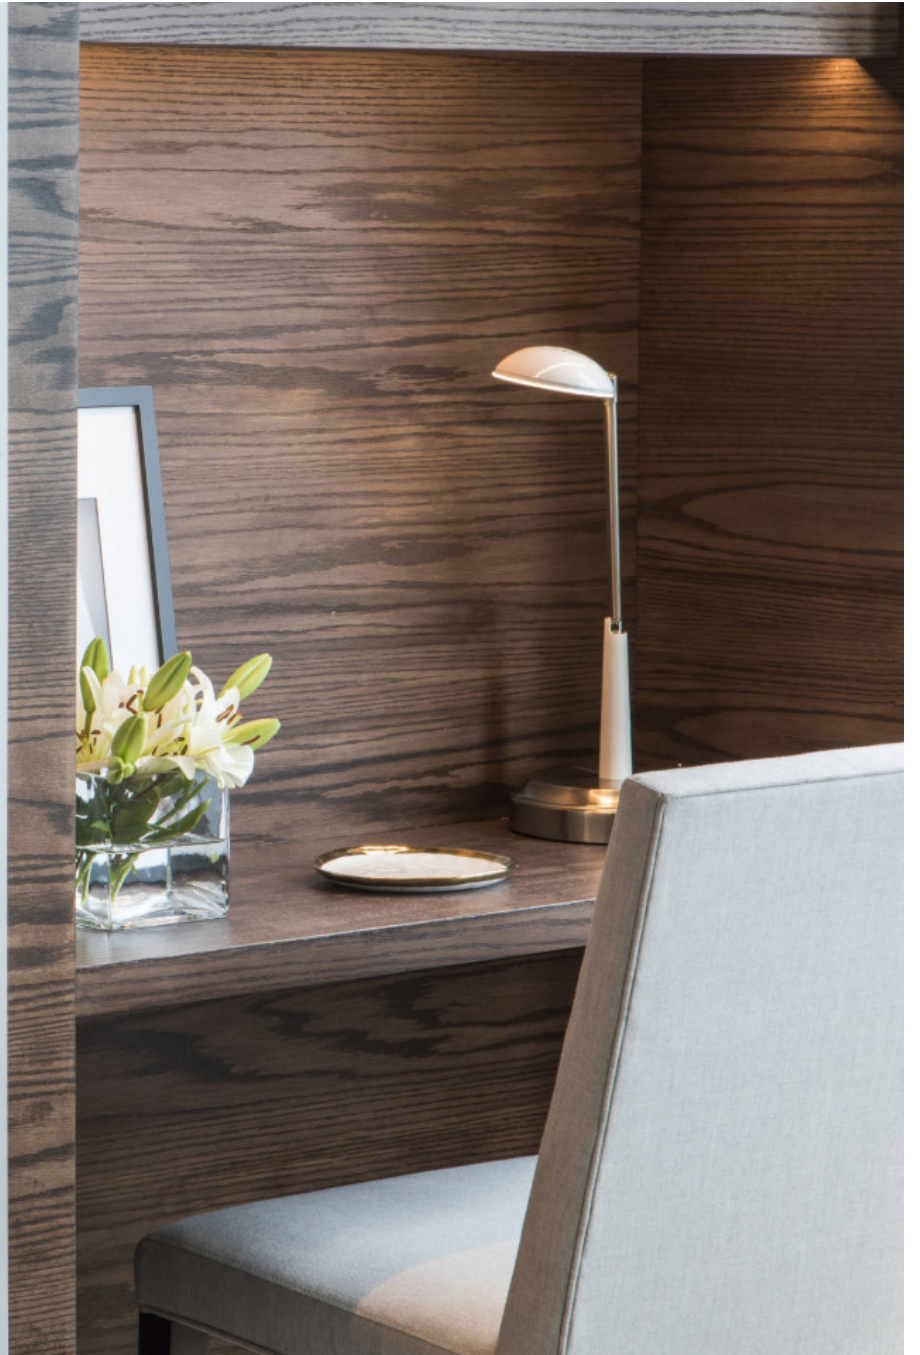

CONTEMPORARY STUDY

Crisp and elegant study to calmfully work in.

For this study we created an elegant and inviting workplace to feel relax and be able to complete your work in. All while being able to store away important documents in smart storage options. For the smart storage, draw packs have been integrated to create an ideal place to keep stationary and documents that could be needed at hand.

The choice of colour being all white allows for a crisp work space, as well as the white allows the room to appear to be bigger and more open. The choice of the floating shelving accompanies the open plan design as it creates a free space to place memorabilia while able to keep it all out on the open.

Open Shelving Units

Open shelving units are an excellent way to show off subtle contrast in the furniture. If a room is a bit smaller, open shelving is a nice feature as it appears to be lighter and allows the room to feel more open instead of a broad wardrobe. This is also a smart and an aesthetically pleasing space to put decorative pieces or memorabilia on display.

“The team suggested helpful storage options that I wouldn’t have considered. Our fitters were brilliant & they worked extremely quickly. Amazing job!”

MR & MRS SOOD

Danmar's Promise

The Danmar team takes great pride in the completion of our client's rooms. A promise that each room will be made to our customer's styles and needs ensuring their new room is personal and individual, as no two families are the same. Each design is meticulously planned by our head architect, who ensures that all building standards are met and that our customers have the most bang for their buck regarding designing and finishing.

Danmars fitting team guarantee their professional services, promising to keep their work space tidy for the end of the day, so that our customers homes are livable and not blowing dust around their house because of any mess ever left. Not only can our team guarantee cleanliness, but also guarantee the highest of customer service right the way through out your Danmar experience from design to finish, happy to answer all questions. Customers are able to call us at any point after your kitchen has been fitted (because accidents happen) for any door replacement service.
